The Department has a generously outfitted computer facility which has more than enough state-of-the-art equipments in quality and quantity to serve the in-class and out-of-class needs of its two hundred and fifty students. All-around networking, free high-speed internet connectivity, various projection facilities, gadgets for audio-visual presentations and film show, digital and manual SLR camera support for photography, are the standard features of our lab facilities. Very recently the whole campus of UAP has been brought under Wi-Fi network coverage. More over the university provides each student with a personal e-mail address containing UAP ID. The Lab has the capacity to meet all the large format and high-resolution printing requirements of its students.
